
Mission Statement

All Canadians deserve equitable access to quality oral healthcare. We have come to recognize significant oral health disparities within our community. We seek to remove barriers and create strategies that venture outside of the conventional dental care setting to reach those unable to access care.

Our mission is to serve our community with compassion and reverence by promoting oral wellness and providing clinical services and resources to help clients prevent oral disease and achieve a lifetime of optimal oral health. We strive to build relationships based on mutual trust and excellent customer service.

We are dedicated to understanding the individual needs of each client and to creating and implementing a care plan and strategies in collaboration to meet those needs.

We are thankful everyday for the opportunity to work within the community to support those who need it.
